

**Statistical Report**

# **DIVORCE AND MARRIAGE RATES FOR EMIRATIS**

**Emirate of Dubai**

**2022-2024**

## Preface

Measuring divorce rates is a systematically organized statistical aspect at the international level, where statistical agencies assess them using standardized methodologies and concepts. The Crude, General, and Refined Divorce rates are among the most significant rates associated with this social phenomenon:

There are many statistical reports, especially the ones related to divorce rates in particular which are issued by unauthorized sources by using insufficient information and inputs, which leads to inaccurate calculations that are not calculated based on the international statistical methodologies. This leads to misleading information that reflects negatively on the public matter.

That's why it is important to rely on the data issued from official statistical authorities to insure the accuracy of the data and rely on it.

## Emiratis and Targeted Groups

Emiratis population are defined as all usual residents within the geographical boundaries of Dubai at certain time, regardless of the emirate that issued their family book/ passport or Marsoom.
