## 1- Population in Dubai

### 1.1 Population size <sup>(1)</sup>

The population size of the Emirate of Dubai is estimated by **1,905,476** individuals at the end of 2010, of whom 1,485,046 are males and 420,430 are females with rates of 77.94% and 22.06% respectively of the total population. The higher proportion of males in Dubai community (353 Males per 100 females) is attributed to the fact that the majority of expatriate workers are males who are not accompanying their family members. Table 1 shows the distribution of the Emirate of Dubai population by sex at the end of 2010.

**Table 1 Population by sex, Dubai end of 2010**

Gender	Number	%
Male	1,485,046	77.94
Female	420,430	22.06
<b>Total</b>	<b>1,905,476</b>	<b>100.00</b>

### 1.2 Estimate of Active Individuals During the Day

The estimated number of active individuals during the day in Dubai are **2,966,312** individuals which includes residents, individuals working in the governmental (federal , local) and private sectors in Dubai and residing outside the Emirate, the average number of tourists and sailors in addition to dynamic movement of people coming into and leaving the emirate during the day.

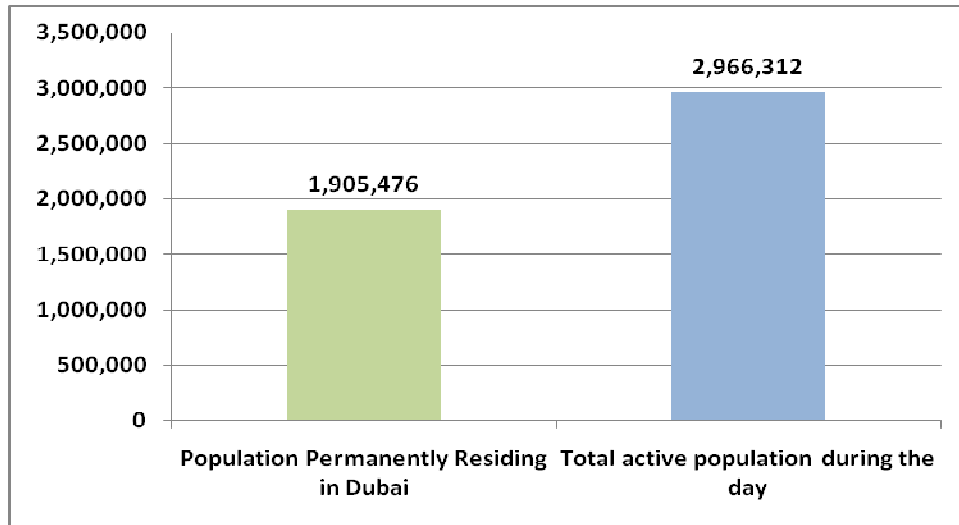

The increasing movement of people during the day is attributed to two main reasons:

- The availability of various investment opportunities in Dubai which necessitate the daily movement of people from other emirates to manage their own businesses or work for others.
- The cheaper accommodation rates in neighboring emirates which lead public and private sectors employees in Dubai to inhabit in these neighboring emirates.

## 2- Distribution of Permanent Residents by Age Groups

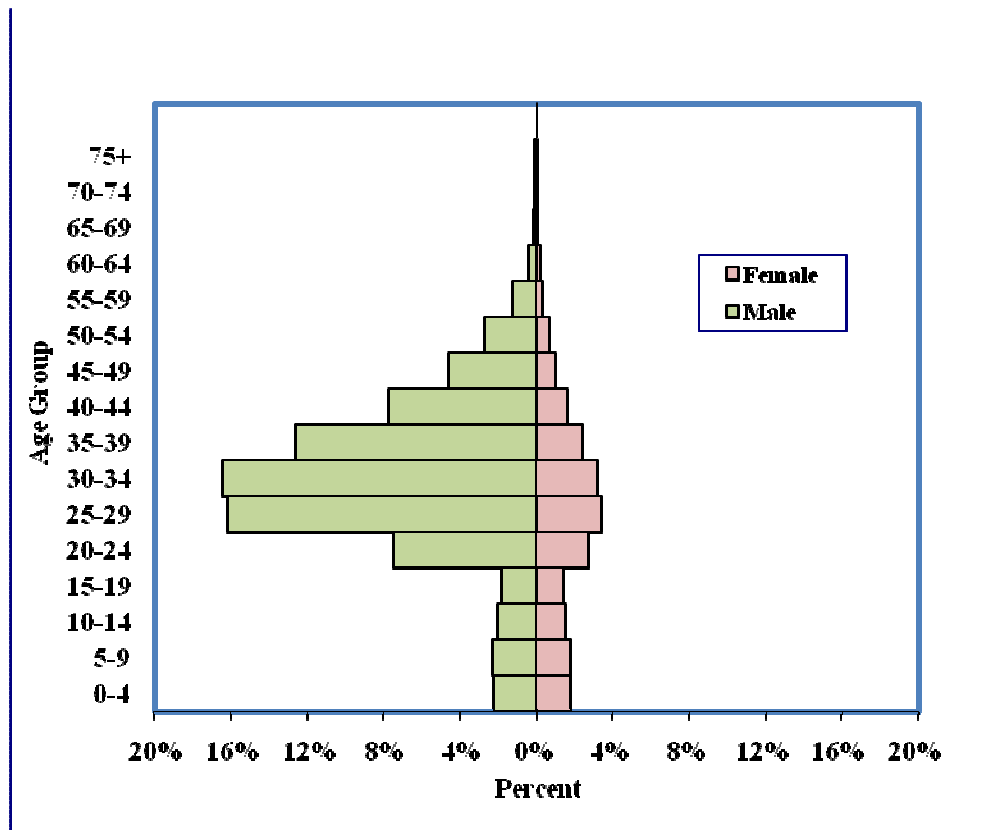

The age and sex structure of Dubai population is considered as unbalanced (unnatural). This unbalanced structure is ascribed to the large proportion of foreign workers, most of which are working-age males in particular, which is a result of rapid economic growth witnessed by the emirate. This is shown clearly by Figure 2 which displays the population pyramid of Dubai.

In addition, about two third of the population is concentrated in the 20-39 age group where the 30-34 age group has the highest number of individuals 373,910 which represents 19.62% of total population, followed by the 25-29 age group with 372,808 individuals and a percentage of 19.57% of the population. Moreover, the 35-39 age group comes in the third place with 285,760 individuals and a percentage of 15.00% of total population.

### 3 - Population Distribution by Sector

Dubai is divided into 9 sectors. In light of the population distribution according to the main sectors in 2010, it is clear that the highest population concentration is in sector 3 with 743,946 residents and 39.04% of total population, followed by sector 2 with a concentration of 401,604 residents and 21.08%, while sector 1 comes in the third place with 378,324 residents and 19.85% of total population. Additionally, sectors 7-9 reached 30,747 residents with 1.62% of total population as shown in the table below:

#### 4- Distribution of Population by Communities

Collecting data about the distribution of population by communities is significant for planning purposes. It provides facts that portray the picture of the population size in each region for planners and decision makers which allows them to generate necessary plans and programs taking into account the context of each community. This will help in meeting the needs of public facilities and services of each of those communities.

As described in table 5 below, MUHAISANAH SECOND (264) has the highest number of population with 163,238 individuals that represents 8.57% of Dubai population. This community is followed by JABAL ALI INDUSTRIAL FIRST Area (599) with 109,167 individuals and a percentage of 5.73%. Moreover, AL GOZE IND. SECOND (365) comes in the third place with a population size of 96,344 individuals and a percentage of 5.06% preceding the AL KARAMA Area (318) that has a population of 68,174 individuals and a percentage of 3.58%. These four Dubai communities together have a population size of 436,923 individuals and represent 22.94% of the total population size of the Emirate of Dubai. Those later figures can be explained by the presence of several labor accommodation camps in the mentioned above communities.
