

Population Bulletin

Emirate of Dubai

2024

1. Population

1.1 Population Size (1)

The population size of the Emirate of Dubai is estimated by 4,248,200 individuals at the end of 2024, 68.5% of them are males with a total of 2,911,500 individuals, and 31.5% of them are females with a total of 1,336,700 individuals. The higher proportion of males in Dubai community (218 Males per 100 Females) is referred to the external workers who are arriving individually without their family members. On the other hand, there is a balance in the distribution of each gender within the households, which is one of the unique characteristics of Dubai's demographic structure as the male and female ratio is balanced at the household level. Table 1 shows the distribution of the Emirate of Dubai population by gender at the end of 2022-2024.

Table 1 - Population by Gender, Emirate of Dubai - End of 2022-2024

Gender	202	2	2023		2024	
Gender	Number	%	Number	%	Number	%
Male	2,554,300	68.70	2,726,200	68.60	2,911,500	68.53
Female	1,163,700	31.30	1,248,100	31.40	1,336,700	31.47
Total	3,718,000	100.00	3,974,300	100.00	4,248,200	100.00

Estimates for the period 2022-2024 have been revised and adjusted based on the results of the Dubai Population Now project 2025 calculated using a register-based approach.

1.2 Estimated Active Individuals During Peak Hours "Daytime"

The usual active individuals during the day in the peak hours are estimated with a number of 5,937,800 individuals which includes residents of Dubai and the employees residing outside the emirate who are working in all type of sectors: local government, federal government and private sector. Moreover, it includes the average number of tourists and sailors, in addition to dynamic movement of people coming into Dubai through the peak hours and heading back home in the other emirates. Peak hours in Dubai starts from 6:30 am to 8:30 pm.

There are two main reasons for that:

- Dubai is a commercial and tourist hub that attracts residents from neighboring emirates for shopping, tourism, business management, or employment.
- A portion of employees in both the government and private sectors reside in neighboring emirates due to relatively lower housing rental costs.

Table 2 - Active Individuals Movement During Peak Hours, Emirate of Dubai - End of 2024

Description	Number
Population Usually Residing in Dubai (2)	4,248,200
Workers Residing Outside Dubai & Temporary Residents (3)	1,689,600
Total Active Individuals During Peak Hours	5,937,800

Figure 1 - Active Individuals' Movement During Peak Hours, Emirate of Dubai - End of 2024

2. Population Distribution by Age Groups in Dubai

The age and gender structure of Dubai population usual residents is considered as unbalanced (unnatural). The reason behind this is that there is a large proportion of male foreign workers which is a result of rapid economic growth witnessed by the emirate. This is shown clearly by Figure 2 which displays the population pyramid of Dubai at the end of 2024.

The majority of the residents are aged between 25 to 44 years, representing 56.72% of the population in Dubai. 15.44% of them are in 30-34 age group, representing the highest population by age with a total of 655,447 individuals. The second highest age group is 35-39 represented by total of 638,861 individuals and a percentage of 15.04% of the population. The third highest is the 25-29 age group with a total of 615,043 individuals representing 14.48% of the total Dubai population.

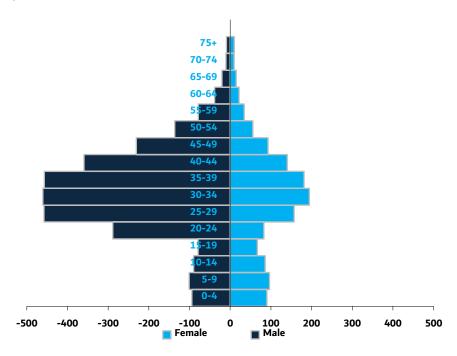

Table 3- Population by Age Group and Gender, Emirate of Dubai - End of 2024 (4)

3. Population Distribution by Planning Sector in Dubai

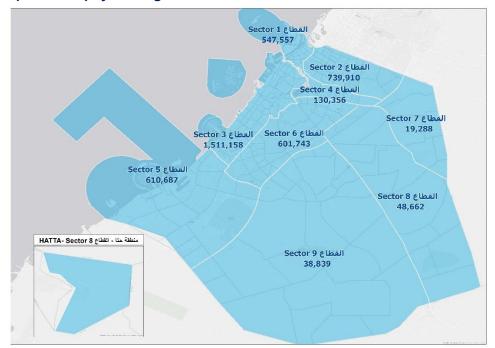

Dubai is divided into nine sectors according to the population distribution of the main sectors by the end of 2024. The highest population concentration is in sector 3 with a total of 1,511,158 residents representing 35.57% of the total population. The second highest is sector 2 with a total of 739,910 residents representing 17.42% of the population. The third highest is sector 5 with a total of 610,687 residents representing 14.38% of total population. Moreover, sectors 7-9 reached 106,789 residents with 2.51% of total Dubai population as shown in the table below.

Table 4 - Population by Planning Sectors, Emirate of Dubai - End of 2024 (4)

Sector	Population	%
(1)	547,557	12.89
(2)	739,910	17.42
(3)	1,511,158	35.57
(4)	130,356	3.07
(5)	610,687	14.38
(6)	601,743	14.16
(7)	19,288	0.45
(8)	48,662	1.15
(9)	38,839	0.91
Total Population	4,248,200	100.00

4. Population Distribution by Communities in Dubai

The population distribution by communities allows to get a realistic idea about the population size in each community, which helps the planners and decision makers for better planning and generating necessary plans needed for each community. This helps in maintaining each community's privacy and insuring that it has its own public facilities and services.

As described in table 5 below, Jabal Ali Industrial First (599) has the highest population with 205,079 individuals that represents 4.83% of Dubai's population. The second highest is Muhaisanah Second (264) with 160,831 individuals and a percentage of 3.79%. AlGouz Industrial Second (365) comes in the third place with a population size of 144,327 individuals and a percentage of 3.40%. After that, comes Warsan First Area (621) that has a population of 120,353 individuals and a percentage of 2.83%. They totally represent 14.85% of Dubai's population with a total of 630,590 individuals. The reason behind the high population in these communities is that they contain several labor camps and collective households.

	Total	4,484,200	100.00

The lands of the two communities "(916 Al-Yafrah 2) & (918 Al-Yafrah 3)" were merged as a whole into Community 914 MADINAT HIND 4 (UMM NAHAD FOURTH previously).

Source: Dubai Data & Statistics Establishment—Yearly Population Estimates

Population are all individuals living within the geographical boundaries of the Emirate, whether they have citizenship of, or were residents based on the population census or the population projections.

Estimated based on the Hybrid Approach.

⁽³⁾ Includes a percentage of federal and local governments, and private sector employees who resides outside the Emirate plus the average number of tourists and sailors.

⁽⁴⁾ Estimated.

⁽⁵⁾ Value less than the unit of measure.
