## 1. Population

### 1.1 Population Size <sup>(1)</sup>

The population size of the Emirate of Dubai is estimated by 2,327,350 individuals at the end of 2014, of whom 1,613,175 are males and 714,175 are females with rates of 69.3% and 30.7% respectively of the total population. The higher proportion of males in Dubai community (226 Males per 100 Females) is attributed to the fact that the majority of expatriate workers are males who are not accompanying their family members. Table 1 shows the distribution of the Emirate of Dubai population by sex at the end of 2014.

### 1.2 Estimate of Active Individuals During Peak Hours “the Day”

The estimated number of active individuals during peak hours “the day” in Dubai are 3,408,350 individuals which includes residents, individuals working in the governmental (federal, local) and private sectors in Dubai and residing outside the Emirate, the average number of tourists and sailors in addition to dynamic movement of people coming into and leaving the emirate during peak hours “the usual daily peak hours from Saturday to Thursday 6:30 am to 8:30 pm”.

The increasing movement of people during peak hours is attributed to two main reasons:

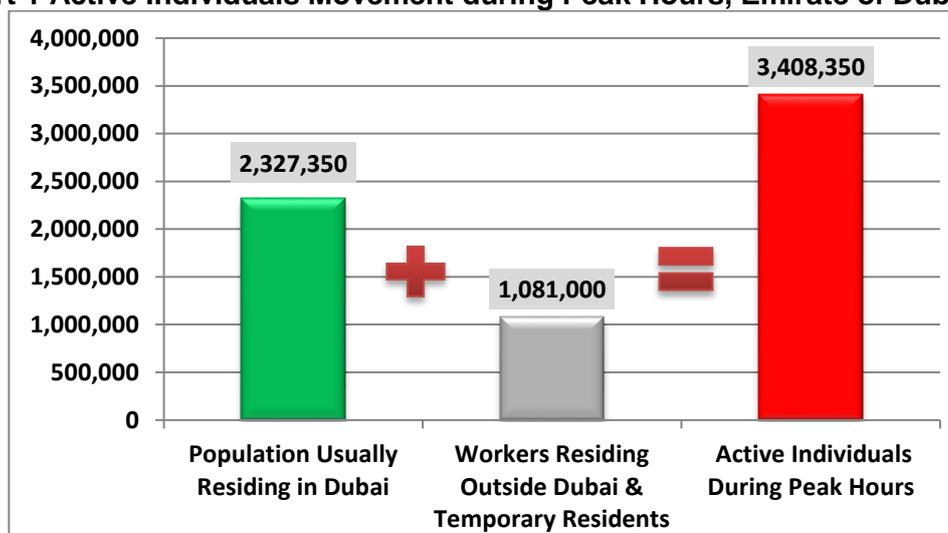

- The availability of various investment opportunities in Dubai which necessitate the daily movement of people from other emirates to manage their own businesses or work for others.
- The cheaper accommodation rates in neighboring emirates which lead public and private sectors employees in Dubai to inhabit in these neighboring emirates.

## 2. Distribution of Permanent Residents by Age Groups

The age and sex structure of Dubai population is considered as unbalanced (unnatural). This unbalanced structure is ascribed to the large proportion of foreign workers, most of which are working-age males in particular, which is a result of rapid economic growth witnessed by the emirate. This is shown clearly by Figure 2 which displays the population pyramid of Dubai at the end of 2014.

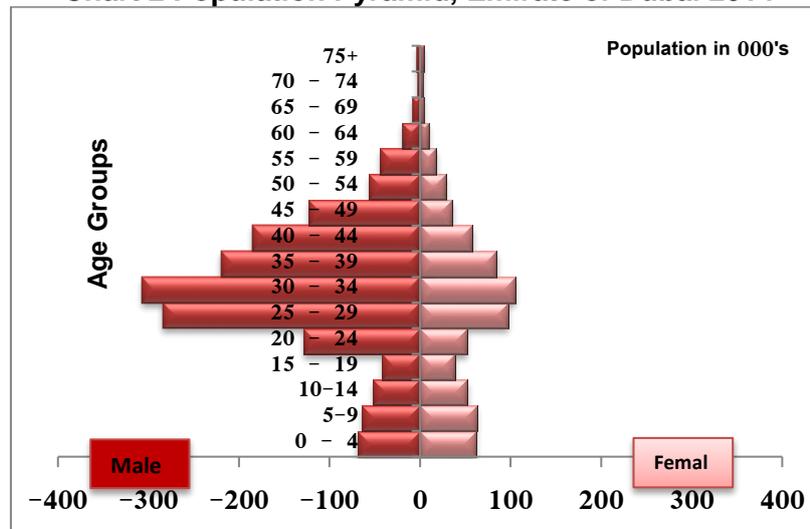

In addition, about 58.00% of the population is concentrated in the 25-44 age group where the 30-34 age group has the highest number of individuals 412,784 which represents 17.74% of total population, followed by the 25-29 age group with 381,869 individuals and a percentage of 16.41% of the population. Moreover, the 35-39 age group comes in the third place with 304,708 individuals and a percentage of 13.09% of total population.

### 3. Population Distribution by Sector

Dubai is divided into 9 sectors. In light of the population distribution according to the main sectors in 2014, it is clear that the highest population concentration is in sector 3 with 889,155 residents and 38.21% of total population, followed by sector 2 with a concentration of 492,368 residents and 21.16%, while sector 1 comes in the third place with 454,043 residents and 19.51% of total population. Additionally, sectors 7-9 reached 44,357 residents with 1.90% of total population as shown in the table below.

### 4. Distribution of Population by Communities

Collecting data about the distribution of population by communities is significant for planning purposes. It provides facts that portray the picture of the population size in each region for planners and decision makers which allows them to generate necessary plans and programs taking into account the context of each community. This will help in meeting the needs of public facilities and services of each of those communities.

As described in table 5 below, MUHAISANAH SECOND (264) has the highest number of population with 171,954 individuals that represents 7.39% of Dubai population. This community is followed by AL GOZE IND. SECOND (365) with 113,619 individuals and a percentage of 4.88%. Moreover, JABAL ALI INDUSTRIAL

FIRST (599) comes in the third place with a population size of 109,167 individuals and a percentage of 4.69% preceding the AL KARAMA Area (318) that has a population of 75,780 individuals and a percentage of 3.26%. These four Dubai communities together have a population size of 470,520 individuals and represent 20.22% of the total population size of the Emirate of Dubai. Those later figures can be explained by the presence of several labor accommodation camps in the mentioned above communities.
