## 1. Population

### 1.1 Population Size <sup>(1)</sup>

The population size of the Emirate of Dubai is estimated by **2,976,455** individuals at the end of 2017, of whom **2,088,870** are males and **887,585** are females with rates of **70.18%** and **29.82%** respectively of the total population. The higher proportion of males in Dubai community (**235 Males per 100 Females**) is attributed to the fact that the majority of expatriate workers are males who are not accompanying their family members. Table 1 shows the distribution of the Emirate of Dubai population by sex at the end of **2017**.

**Table 1 Population by Sex, Emirate of Dubai- End of 2017**

Sex	Number	%
Male	2,088,870	70.18
Female	887,585	29.82

### 1.2 Estimate of Active Individuals During Peak Hours “the Day”

The estimated number of active individuals during peak hours “the day” in Dubai are **4,163,020** individuals which includes residents, individuals working in the governmental (federal, local) and private sectors in Dubai and residing outside the Emirate, the average number of tourists and sailors in addition to dynamic movement of people coming into and leaving the emirate during peak hours “the usual daily peak hours from Saturday to Thursday **6:30 am to 8:30 pm**”.

The increasing movement of people during peak hours is attributed to two main reasons:

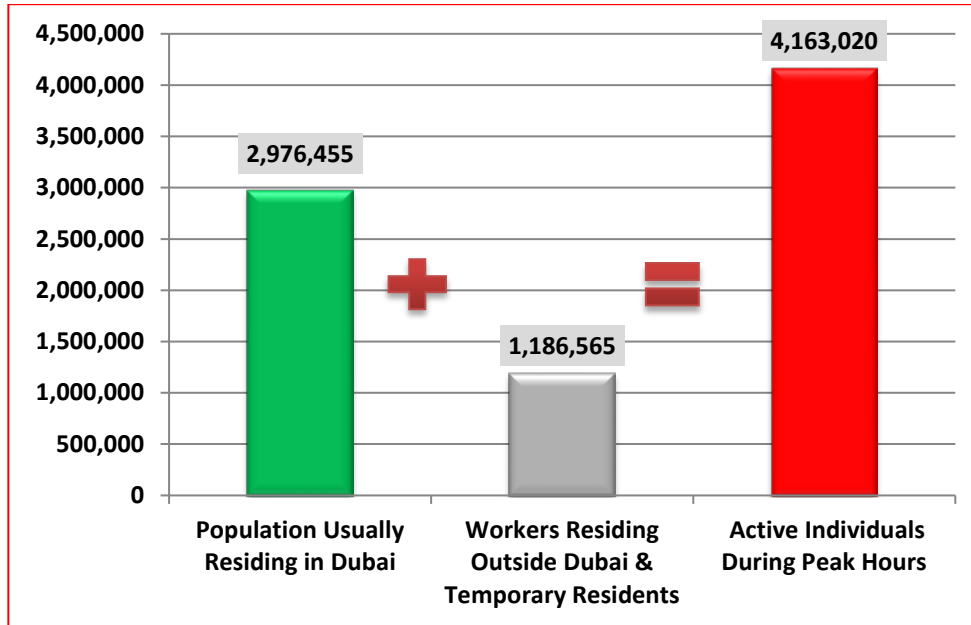

- The availability of various investment opportunities in Dubai which necessitate the daily movement of people from other emirates to manage their own businesses or work for others.
- The cheaper accommodation rates in neighboring emirates which lead public and private sectors employees in Dubai to inhabit in these neighboring emirates.

## 2. Distribution of Permanent Residents by Age Groups

The age and sex structure of Dubai population is considered as unbalanced (unnatural). This unbalanced structure is ascribed to the large proportion of foreign workers, most of which are working-age males in particular, which is a result of rapid economic growth witnessed by the emirate. This is shown clearly by Figure 2 which displays the population pyramid of Dubai at the end of 2017.

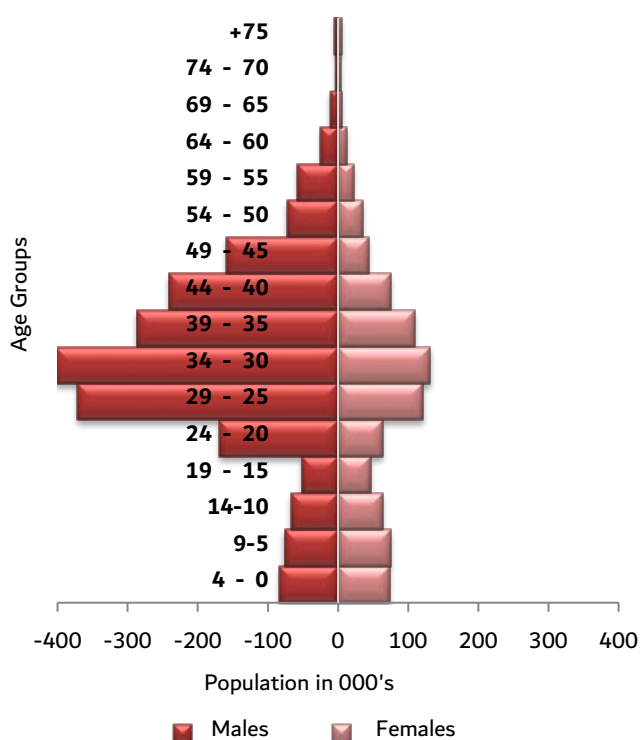

In addition, about **58.46%** of the population is concentrated in the **25-44** age group where the **30-34** age group has the highest number of individuals **533,129** which represents **17.91%** of total population, followed by the **25-29** age group with **493,463** individuals and a percentage of **16.58%** of the population. Moreover, the **35-39** age group comes in the third place with **396,420** individuals and a percentage of **13.32%** of total population.

### 3. Population Distribution by Sector

Dubai is divided into 9 sectors. In light of the population distribution according to the main sectors in 2017, it is clear that the highest population concentration is in sector 3 with **1,080,338** residents and **36.30%** of total population, followed by sector 2 with a concentration of **609,204** residents and **20.46%**, while sector 1 comes in the third place with **447,137** residents and **15.02%** of total population. Additionally, sectors 7-9 reached **57,277** residents with **1.93%** of total population as shown in the table below.

Table 4 Population by Sectors, Emirate of Dubai- End of 2017<sup>(4)</sup>

### 4. Distribution of Population by Communities

Collecting data about the distribution of population by communities is significant for planning purposes. It provides facts that portray the picture of the population size in each region for planners and decision makers which allows them to generate necessary plans and programs taking into account the context of each community. This will help in meeting the needs of public facilities and services of each of those communities.

As described in table 5 below, **MUHAISANAH SECOND (264)** has the highest number of population with **202,918** individuals that represents **6.82%** of Dubai population. This community is followed by **AL GOZE IND. SECOND (365)** with **157,966** individuals and a percentage of **5.31%**. Moreover, **JABAL ALI INDUSTRIAL FIRST (599)** comes in the third place with a population size of **129,239** individuals and a percentage of **4.34%** preceding the **WARSAN FIRST Area (621)** that has a population of **94,460** individuals and a percentage of **3.17%**. These four Dubai communities together have a population size of **584,583** individuals and represent **19.64%** of the total population size of the Emirate of Dubai. Those later figures can be explained by the presence of several labor accommodation camps in the mentioned above communities.
