

Population Bulletin

Emirate of Dubai

2019

1. Population

1.1 Population Size ⁽¹⁾

The population size of the Emirate of Dubai is estimated by **3,355,100** individuals at the end of 2019, of whom **2,331,800** are males and **1,024,100** are females with rates of **69.48%** and **30.52%** respectively of the total population. The higher proportion of males in Dubai community (**228 Males per 100 Females**) is attributed to the fact that the majority of expatriate workers are males who are not accompanying their family members, this is a kind of privacy that characterizes the demographic structure of the emirate, as the male and female ratio is balanced at the household level. Table 1 shows the distribution of the Emirate of Dubai population by **gender** at the end of **2019**.

Table 1 - Population by Gender, Emirate of Dubai - End of 2019

Gender	Number	%
Male	2,331,800	69.48
Female	1,024,100	30.52
Total	3,355,900	100.00

1.2 Estimate of Active Individuals During Peak Hours “the Day”

The estimated number of active individuals during peak hours “the usual” in Dubai are **4,551,900** individuals which includes residents, individuals working in the governmental (federal, local) and private sectors in Dubai and residing outside the Emirate, the average number of tourists and sailors in addition to dynamic movement of people coming into and leaving the emirate during peak hours “the usual daily peak hours from Saturday to Thursday **6:30 am to 8:30 pm**”.

The increasing movement of people during peak hours is attributed to two main reasons:

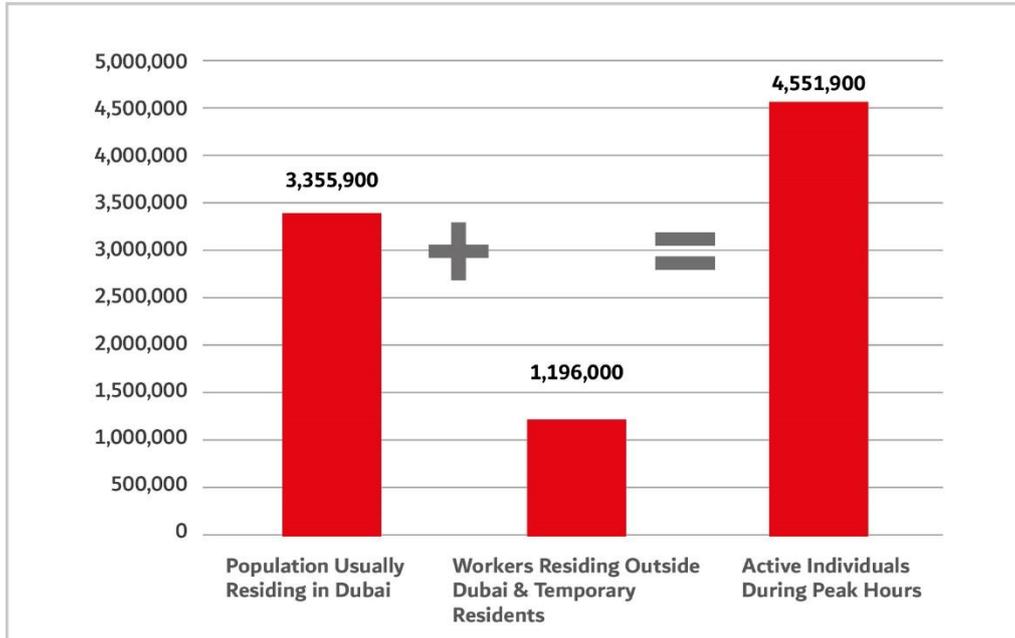

- Dubai is a commercial and tourist city that attracts residents of neighboring emirates, whether shopping, tourism and to manage their own businesses or work for others.
- The cheaper accommodation rates in neighboring emirates which lead public and private sectors employees in Dubai to inhabit in these neighboring emirates.

Table 2 - Active Individuals Movement During Peak Hours, Emirate of Dubai - End of 2019

Description	Number
Population Usually Residing in Dubai ⁽²⁾	3,355,900
Workers Residing Outside Dubai & Temporary Residents ⁽³⁾	1,196,000
Total Active Individuals During Peak Hours	4,551,900

Emirate of Dubai - End of 2019**

2. Distribution of Usually Residents by Age Groups

The age and gender structure of Dubai population is considered as unbalanced (unnatural). This unbalanced structure is ascribed to the large proportion of foreign workers, most of which are working-age males in particular, which is a result of rapid economic growth witnessed by the emirate. This is shown clearly by Figure 2 which displays the population pyramid of Dubai at the end of 2019.

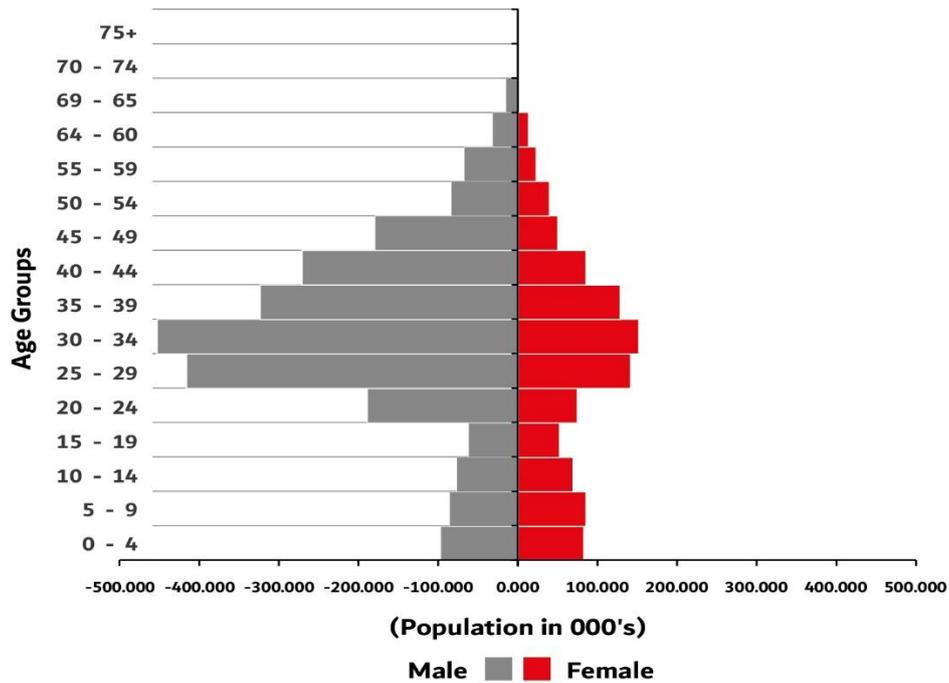

In addition, about **58.63%** of the population is concentrated in the **25-44** age group where the **30-34** age group has the highest number of individuals **602,962** which represents **17.97%** of total population, followed by the **25-29** age group with **558,262** individuals and a percentage of **16.64%** of the population. Moreover, the **35-39** age group comes in the third place with **448,718** individuals and a percentage of **13.37%** of total population.

Table 3- Population by Age Group and Gender, Emirate of Dubai - End of 2019 ⁽⁴⁾

Age Group	Male	Female	Total	%
0-4	92,782	83,735	176,517	5.26
5-9	85,963	84,958	170,921	5.09
10-14	74,736	71,379	146,115	4.35
15-19	58,530	52,486	111,016	3.31
20-24	188,657	75,335	263,992	7.87
25-29	415,773	142,489	558,262	16.64
30-34	449,412	153,550	602,962	17.97
35-39	320,803	127,915	448,718	13.37
40-44	270,050	87,376	357,426	10.65
45-49	178,449	50,502	228,951	6.82

3. Population Distribution by Sector

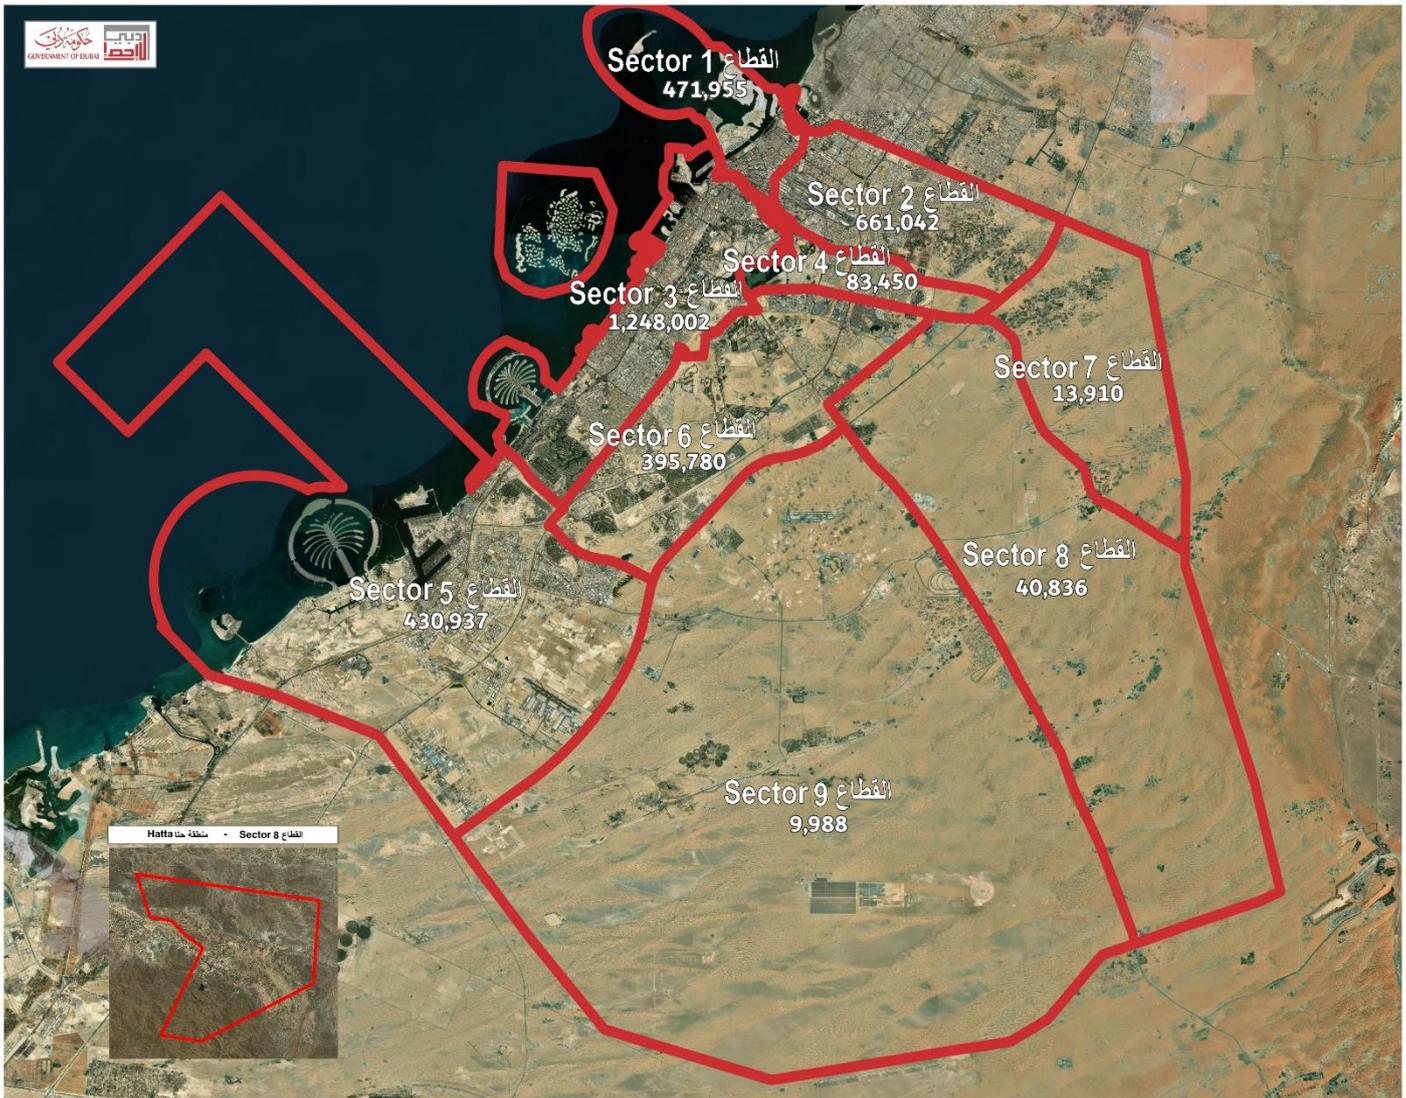

Dubai is divided into **9** sectors. In light of the population distribution according to the main sectors in **2019**, it is clear that the highest population concentration is in sector **3** with **1,248,002** residents and **37.19%** of total population, followed by sector **2** with a concentration of **661,042** residents and **19.70%**, while sector **1** comes in the third place with **471,955** residents and **14.06%** of total population. Additionally, sectors **7-9** reached **64,734** residents with **1.93%** of total population as shown in the table below.

Table 4 - Population by Sectors, Emirate of Dubai - End of 2019 ⁽⁴⁾

Sector	Population	%
(1)	471,955	14.06
(2)	661,042	19.70
(3)	1,248,002	37.19
(4)	83,450	2.49
(5)	430,937	12.84
(6)	395,780	11.79
(7)	13,910	0.41
(8)	40,836	1.22
(9)	9,988	0.30
Total	3,355,900	100.00

4. Distribution of Population by Communities

Collecting data about the distribution of population by communities is significant for planning purposes. It provides facts that portray the picture of the population size in each region for planners and decision makers which allows them to generate necessary plans and programs taking into account the context of each community. This will help in meeting the needs of public facilities and services of each of those communities.

As described in table 5 below, **MUHAISANAH SECOND (264)** has the highest number of population with **196,316** individuals that represents **5.85%** of Dubai population. This community is followed by **AL GOZE IND. SECOND (365)** with **159,978** individuals and a percentage of **4.77%**. Moreover, **JABAL ALI INDUSTRIAL FIRST (599)** comes in the third place with a population size of **128,975** individuals and a percentage of **3.84%** preceding the **WARSAN FIRST Area (621)** that has a population of **106,072** individuals and a percentage of **3.16%**. These four Dubai communities together have a population size of **591,341** individuals and represent **17.62%** of the total population size of the Emirate of Dubai. Those later figures can be explained by the presence of several labor accommodation camps in the mentioned above communities.
