

Population Bulletin Emirate of Dubai 2015

1. Population

1.1 Population Size (1)

The population size of the Emirate of Dubai is estimated by 2,446,675 individuals at the end of 2015, of whom 1,703,355 are males and 743,320 are females with rates of 69.62% and 30.38% respectively of the total population. The higher proportion of males in Dubai community (229 Males per 100 Females) is attributed to the fact that the majority of expatriate workers are males who are not accompanying their family members. Table 1 shows the distribution of the Emirate of Dubai population by sex at the end of 2015.

Table 1 Population by Sex, Emirate of Dubai - End of 2015

Sex	Number	%
Male	1,703,355	69.62
Female	743,320	30.38
Total	2,446,675	100.00

1.2 Estimate of Active Individuals During Peak Hours "the Day"

The estimated number of active individuals during peak hours "the day" in Dubai are 3,552,175 individuals which includes residents, individuals working in the governmental (federal, local) and private sectors in Dubai and residing outside the Emirate, the average number of tourists and sailors in addition to dynamic movement of people coming into and leaving the emirate during peak hours "the usual daily peak hours from Saturday to Thursday 6:30 am to 8:30 pm".

The increasing movement of people during peak hours is attributed to two main reasons:

- The availability of various investment opportunities in Dubai which necessitate the daily movement of people from other emirates to manage their own businesses or work for others.
- The cheaper accommodation rates in neighboring emirates which lead public and private sectors employees in Dubai to inhabit in these neighboring emirates.

Table 2 Active Individuals Movement During Peak Hours, Emirate of Dubai - End of 2015

Description	Total
Population Usually Residing in Dubai ⁽²⁾	2,446,675
Workers Residing Outside Dubai & Temporary Residents ⁽³⁾	1,105,500
Total Active Individuals During Peak Hours	3,552,175

2. Distribution of Permanent Residents by Age Groups

The age and sex structure of Dubai population is considered as unbalanced (unnatural). This unbalanced structure is ascribed to the large proportion of foreign workers, most of which are working-age males in particular, which is a result of rapid economic growth witnessed by the emirate. This is shown clearly by Figure 2 which displays the population pyramid of Dubai at the end of 2015.

In addition, about 58.00% of the population is concentrated in the 25-44 age group where the 30-34 age group has the highest number of individuals 434,187 which represents 17.75% of total population, followed by the 25-29 age group with 401,889 individuals and a percentage of 16.43% of the population. Moreover, the 35-39 age group comes in the third place with 320,419 individuals and a percentage of 13.10% of total population.

Table 3 Population by Age Group and Sex, Emirate of Dubai– End of $2015\,{}^{(4)}$

Age Group	Male	Female	Total	%
0-4	72,051	64,421	136,472	5.58
5-9	65,788	65,027	130,815	5.35

3. Population Distribution by Sector

Dubai is divided into 9 sectors. In light of the population distribution according to the main sectors in 2015, it is clear that the highest population concentration is in sector 3 with 928,046 residents and 37.92% of total population, followed by sector 2 with a concentration of 496,163 residents and 20.28%, while sector 1 comes in the third place with 464,307 residents and 18.98% of total population. Additionally, sectors 7-9 reached 45,608 residents with 1.86% of total population as shown in the table below.

Table 4 Population by Sectors, Emirate of Dubai - end of 2015⁽⁴⁾

Sector	Population	%
(1)	464,307	18.98
(2)	496,163	20.28
(3)	928,046	37.92
(4)	43,829	1.79
(5)	328,588	13.43
(6)	140,134	5.73
(7)	9,097	0.37
(8)	31,719	1.30
(9)	4,792	0.20
Total	2,446,675	100.00

4. Distribution of Population by Communities

Collecting data about the distribution of population by communities is significant for planning purposes. It provides facts that portray the picture of the population size in each region for planners and decision makers which allows them to generate necessary plans and programs taking into account the context of each community. This will help in meeting the needs of public facilities and services of each of those communities.

As described in table 5 below, MUHAISANAH SECOND (264) has the highest number of population with 173,993 individuals that represents 7.11% of Dubai population. This community is followed by JABAL ALI INDUSTRIAL FIRST (599) with 126,123 individuals and a percentage of 5.15%. Moreover, AL GOZE IND. SECOND (365) comes in the third place with a population size of 113,619 individuals and a percentage of 4.64% preceding the AL KARAMA Area (318) that has a population of 76,241 individuals and a percentage of 3.12%. These four Dubai communities together have a population size of 489,976 individuals and represent 20.02% of the total population size of the Emirate of Dubai. Those later figures can be explained by the presence of several labor accommodation camps in the mentioned above communities.

Source: Dubai Statistics Center - Yearly Population Estimates

⁽I) Population are all individuals living within the geographical boundaries of the Emirate, whether they have citizenship of, or were residents based on the population census or the population projections.

Estimated based on the annual population growth rate (5.0%).

⁽³⁾ Includes a percentage of federal and local governments, and private sector employees who resides outside the Emirate plus the average number of tourists and sailors.

⁽⁴⁾ Estimated.

⁽⁵⁾ Value less than the unit of measure.
